JAMIU I. **FAWAZ**

✉ famaths01@gmail.com | 📞 +234-908-653-1144 | 🏠 No 14 Adekunle Ashafa, Ikorodu, igbogbo, Lagos State, Nigeria.

PROFILE

Fawaz is a full-stack software developer with 4+ years of professional experience working with web technologies. His primary stacks include PHP and Laravel, Nodejs and Express, Python and Flask, JavaScript and React Js, Bootstrap, JQuery and Ajax, and his secondary stacks include MySQL and PostgreSQL, CI/CD and pipelines, and Linux.

He is knowledgeable in building APIs using PHP & Nodejs REST Framework constructing robust and secure backend.

I am technically minded personnel with vast knowledge across Networking (using cisco packet tracer to simulate and designing Networks), basic Pentesting and Cybersecurity, making it easier for me to write clean and secure codes.

He Holds a Bachelor of Science in Food Engineering from University of Ilorin. Passionate about leveraging technology to solve complex problems. Eager to tackle new challenges and collaborate with others to drive innovation. With excellent interpersonal skills and problem-solving skills. I am a fast learner capable of quickly mastering new skills, technologies, and roles.

PROFESSIONAL EXPERIENCE

Fullstack Developer

DM Holdings Limited | Sept 2023 - Till-Date

- I design website using Bootstrap, React and vanilla JS..
- I am also responsible for Software development and testing. the company has many project under its, so base on the project is the stack that would be used.
- I am responsible for providing solution to IT problems that the company face.
- Troubleshooting of APIs, also responsible for debugging and providing solutions when software or application is down.
- I am working with a team on the development of a web application for a subsidiary under the company. the project ease the day to day activities and transactions for its users.

Remote Backend Developer

Topupmate Technology | Sept 2022 - July 2023

- I participated with a team to develop Bill Payment Platform, that benefits more than 200 clients and small scale businesses that want to venture into VTU Business but does have little Knowledge of Web App Development. This project was built On PHP(OOP) and using Mysql database. Which later was built on NodeJs & Express and PostgreSQL as Database.
- Installing Script for clients that want to adopt the software. As the Web App was built to be configurable to client taste.
- Development and Integration of APIs. API was also built to be flexible for clients to choose any APIs they want to consume.
- Managing and Maintaining the script. Also adding Updates
- Frontend Development for a client wanting a different Website Design for Home page Or Admin Dashboard.

Software Developer Intern

Webmable | Aug 2022 - Nov 2021
